Maximum Marks : 250

अधिकतम अंक : 250

## GENERAL STUDIES / सामान्य अध्ययन

Name of Candidate

परीक्षार्थी का नाम

Roll No./अनुक्रमांक

Center Code/परीक्षा केंद्र

Date/दिनांक

1901

11/08/26

Medium/माध्यम

English ☒ हिंदी ☐

Start Time /प्रारंभ करने का समय

9 am

End Time /समाप्त करने का समय

11:50 am

\*Center Code : For Online - 1900 / Delhi : Karol bagh - 1901, ORN - 1902, Mukherjee Nagar - 1903 / Patna : Boring Rd. - 2001 / Hyderabad : RTC X Road - 2101

## INSTRUCTIONS

- Please do furnish Name, Email, Roll No and Mobile in the answer sheet.
- There are 20 Questions printed in ENGLISH & HINDI, all questions are compulsory.
- The number of marks carried by a question/part is indicated against it.
- Answers must be written in the medium authorized in the admission Certificate, which must be stated clearly on the cover of this Question-Cum-Answer (QCA) Booklet in the space provided.
- Word limit in questions, if specified, should be adhered to. Any page or portion of the page left blank in the Question-Cum Answer Booklet must be clearly struck off.
- Do mention the Start Time and End Time of the Test correctly. Failure to do so may attract a penalty on the marks secured.

## अनुदेश

- कृपया उत्तर-पुस्तिका में नाम, ईमेल, रोल नंबर और मोबाइल नंबर भरे।
- उत्तर पुस्तिका में अंग्रेजी/हिंदी में 20 प्रश्न दिए गए हैं, सभी प्रश्न अनिवार्य हैं।
- प्रत्येक प्रश्न/भाग के लिए निर्धारित अंक उसके सामने अंकित किए गए हैं।
- उत्तर प्रवेश पत्र में अधिकृत माध्यम में लिखे जाने चाहिए, जो कि दिए गए स्थान में इस प्रश्न-सह-उत्तर (क्यूआर) पुस्तिका के कवर पर स्पष्ट रूप से लिखा जाना चाहिए।
- प्रश्नों में शब्द सीमा, यदि निर्दिष्ट हो, का पालन किया जाए। प्रश्न-सह-उत्तर पुस्तिका में खाली छोड़े गये किसी भी पृष्ठ या पृष्ठ के भाग को स्पष्ट रूप से काट दे।
- परीक्षा का प्रारंभ समय और समाप्ति समय अवश्य लिखें। ऐसा न करने पर प्राप्त अंकों पर दंड लग सकता है।

| Q. No.<br>प्र. सं. | Maximum Marks<br>अधिकतम अंक | Marks Obtained<br>प्राप्तांक |

| Total              | 250                         |                              |

Examiner's Discretion/मूल्यांकन कर्ता का विवेक :

Final Marks/कुल अर्जित अंक :

For Office Use  
कार्यालय प्रयोग हेतु

ECN:

18/8

RCN:

30/8

EG:

① ② ③ ④ ⑤

Evaluation Date/मूल्यांकन तिथि:

18/8/26 → 30/8/26

\*Examiner's Discretion is the marks awarded at the discretion of the Examiner based on your overall impression, on the basis of (but not limited to) your handwriting, presentation, use of diagrams, flowcharts, facts and figures or absolutely anything that he/she liked in your copy.

मूल्यांकन कर्ता का विवेक अंक, आपकी लिखावट, प्रस्तुति, आरेखों के उपयोग, फ्लोचार्ट, तथ्यों और आंकड़ों या समग्र रूप किसी अन्य विषय वस्तु, जो मूल्यांकन कर्ता को आपकी कॉपी में पसंद आयी के आधार पर (लेकिन इन्हीं तक सीमित नहीं) पर दिए गए अंक हैं।

Q.1) भारतीय रुपये के मूल्यह्रास (अवमूल्यन) के लिए उत्तरदायी कारकों को रेखांकित कीजिए। भारतीय अर्थव्यवस्था पर इसके निहितार्थों का परीक्षण कीजिए। (10 अंक, 150 शब्द)

Bring out the factors responsible for the depreciation of the Indian Rupee. Examine its implications for the Indian economy. (10 Marks, 150 Words)

Since Jan 2022, fall in 11% value of Indian ₹

historic low → ₹46.96  
(May 2026)

Indian Rupee has been constantly facing a decline in its value in international market as

## Factors

### ① Geopolitical uncertainty

↳ wars and conflicts in west asia leading to sudden surge in crude oil prices

eg \$100 → 1 barrel

→ Persistent CAD  
→ import dependence  
→ global commodity price shock.

### ② Global financial condition

→ Fed tightening Policy

\* Surge in imports (high import bill)

### ② Outflow of foreign investors

### ③ Domestic macroeconomic fundamentals

↳ inflation eroding external competitiveness

↳ decline in FDI investments  
↳ highly volatile nature of FPI

↳ fiscal imbalances weakening macroeconomic confidence

### ③ domestic investors able to invest in international markets

④ Market → speculative trading, excessively high valuations  
→ herd behaviour, corporate hedging.

based on recent India-US talks.

## Implications on Indian Economy →

- cascading effect on inflation → imported inflation, inelastic imports (edible & crude oil)
- High Inflation leading to reduced purchasing power
- exacerbation of CAD (forex outgo) → higher costs of external debt servicing.
- PM of July as all time low after COVID signifies declining production in Indian economy.
- include → higher export competitiveness, promotion to import substitution
- heightened protectionism by foreign products to conserve domestic companies → as imports' cost rising
- promotion to inward remittances → favourable exchange rate
- Higher import GST → attraction as tourist destination

Indian government needs to streamline its domestic policies of make in India & Atmanirbhar Bharat for a developed one!

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO | BODY                         | CONCLUSION |
|--------|--------------------------|-------|------------------------------|------------|
|        |                          | OK    | include positive points more | OK         |

↓  
factual context needed.

Q2) "राष्ट्रीय सहकारिता नीति (NCP) 2025 का उद्देश्य आर्थिक लोकतंत्रीकरण और समावेशी संवृद्धि को बढ़ावा देने के लिए भारत की सहकारी परंपरा की विशिष्ट शक्तियों को आगे बढ़ाना है।" स्पष्ट कीजिए।  
(10 अंक, 150 शब्द)

"The National Cooperation Policy (NCP) 2025 aims to build on the unique strengths of India's cooperative tradition to promote economic democratization and inclusive growth." Elucidate.  
(10 Marks, 150 Words)

## National Cooperation Policy 2025

was enrolled <sup>in 2025</sup> to streamline cooperative sector to enhance its business and make it more inclusive. by 6 strategic pillars

① Promoting Economic democratization

good!

• community owned enterprises

• grassroot economic governance

• state level cooperation policy

→ management to be decentralized for individual cooperatives to work and make changes as per requirement.

→ consensus based decision making with diversity

representation in the board

↳ SC/ST, women representation

②

↳ Enhancing economic growth & inclusive growth

good

↳ Mission mode working to plug the leaks integration of product processing & export

↳ looking at SPIC's with cooperatives ↳ core banking integration

↳ Reservation for women

↳ Easing in access to credit

↳ boosting microfinance

↳ Building Institutional Capability → transparent audit

↳ new economic sector (beyond agriculture) → youth led entrepreneurship

Therefore, the policy mediated

addresses to growing concerns  
enable wider representation and  
enhanced transparency to bolster trust.

not to be concentrated in some states

|--------|--------------------------|-------|-----------------|------------|
|        |                          |       | Add more points |            |

for attempt

Q.3) संधारणीय और जलवायु-अनुकूल कृषि को बढ़ावा देने में कृषि विस्तार सेवाओं की भूमिका की चर्चा कीजिए।  
(10 अंक, 150 शब्द)

Discuss the role of agricultural extension services in promoting sustainable and climate-resilient agriculture.  
(10 Marks, 150 Words)

## Agricultural Extension services

Services that  
give/provide farmers  
with knowledge,  
information & technical  
support

Refer to outside-farmer,  
logistical based services to  
strengthen post harvest  
management.

↓  
enhancing agricultural  
productivity &  
sustainability ⇒ livelihoods

Role played by agricultural  
extension services →

1) Sustainability in Agriculture

good by diversifying options  
with farmers → climate resilient agri

eg Instead of stubble  
burning → resource recycling  
→ stubble utilised

for ethanol production, enabling  
additional incomes to

- Integrated pest  
management  
- agro-biodiversity

Avoid wasting space

farmers.

strengthening climate resilience

2) Promoting climate resilient agriculture <sup>good</sup>

→ water saving techniques  
→ weather based cropping advisory

→ enhancement of shelf life by investing in development of food

Processing Industries

Eg Gramin Krishi Mausam Seva

Eg Pottery & Food parks

→ Science to field adoption

Integrating farmers' knowledge

to modern ways of

→ linking farmers to markets

→ post harvest guidance

agriculture Eg Mixed farming

Natural farming

→ limited extension manpower, fragmented landholdings, digital divide  
last mile connectivity

Therefore, extension services help

reducing the post harvest food losses

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO | BODY                 | CONCLUSION     |
|--------|--------------------------|-------|----------------------|----------------|
|        | →                        | ok    | add more diversified | Add challenges |

points with examples

Q4) "भारत में धान-गेहूँ शस्य प्रणाली (फारसल चक्र) पर अत्यधिक निर्भरता के प्रतिकूल परिणाम कृषि क्षेत्र से भी आगे तक विस्तृत हैं।" स्पष्ट कीजिए।  
(10 अंक, 150 शब्द)

"The adverse consequences of excessive dependence on the rice-wheat cropping system in India extend beyond agriculture." Elucidate.  
(10 Marks, 150 Words)

Introduction :

Cropping pattern is yearly sequence & spatial arrangement of crops on a given area.

India is an agrarian country with ~50% of its population engaged in agriculture.

Cropping Pattern is highly dominated

Dominance due to →

- geo climatic factors
- economic reasons
- socio cultural influences

by rice-wheat as :

↳ assured demand and procurement

↳ covered under MSP

↳ Rice also got introduced to

Green revolution states.

Impact of

- ↳ policy bias
- ↳ agri political economy

Consequences

\* Resource Degradation :

→ unsustainable groundwater extraction

→ free power (72.5% blocks overexploited in Punjab)

→ depleting micronutrients & soil fertility

Adverse consequences of such cropping pattern →

→ Social

↳ over-reliance on MSP

leading to agricultural based society

and not engaging in other  
venues of income along  
with agriculture for social mobility

→ Economic & Nutritional  
↳ fiscal burden as rice-wheat  
as the primary cropping pattern  
↳ limited investment for development  
of food processing industry

→ crowds out pulses  
→ Dietary diversity  
→ nutritional security  
→ mounting subsidy burden

→ Geography & Environment  
↳ Burden on limited water  
resources (eg) Punjab & Haryana  
↳ excessive use of fertiliser,  
changing soil profiles.

→ short harvesting window  
→ residue burning → air pollution  
→ pesticide use  
→ groundwater depletion

→ Political  
↳ lack of dedicated policy to bring  
on ground transformation

Skewed agricultural cropping needs  
high incentives to explore other means  
along with security.

→ Rationalization of MSP  
→ procurement policies  
→ alternative crops

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO | BODY             | CONCLUSION                                |

conclusion

ecological  
resilience  
8

Q.5) 'परमाणु घड़ियाँ' (एटोमिक क्लॉक्स) क्या हैं? उपग्रह-आधारित नौवहन/नेविगेशन प्रणालियों के लिए ये महत्वपूर्ण क्यों हैं? (10 अंक, 150 शब्द)

What are 'atomic clocks'? Why are they critical for satellite-based navigation systems? (10 Marks, 150 Words)

→ highly precise time keeping device

→ time measurement using: natural frequency of electromagnetic radiation

Atomic clocks are made up of rubidium and other rare metals for their ability to work under vacuum (lack of energy level of atoms).  
emitted / absorbed during transition b/w energy level of atoms  
Cesium & Rubidium

### Functioning

① Utilize atomic resonance (influence of gravity)

② Excited atoms using microwave radiation

③ Resonance frequency  
↳ atomic oscillation

④ feedback mechanism for accuracy in time keeping

### Atomic clock

→ Precision value as atomic to show and study scientific change in researches

### Use cases

→ wide usage in satellite based navigation systems

Eg GPS, IRNSS-NAVIC, Galileo

Why so critical?

→ Synchronising satellite constellation

→ Definitive frequency generation

→ efficiency to work under extra-terrestrial conditions

→ uninterrupted navigation

→ notes time events based on changes of surrounding

eg coronal vault rays, magnetic field alteration

→ high resolution to specify inter-spatial location

eg finding route - Google maps

Therefore, atomic clock has transformed and expanded the reach of technology.

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO | BODY                        | CONCLUSION |
|--------|--------------------------|-------|-----------------------------|------------|
|        |                          |       | understand the concept well |            |

Q.6) सार्वजनिक रूप से वित्तपोषित अनुसंधान अक्सर वाणिज्यिक प्रकाशकों के शुल्क अवरोध (पेवॉल) के पीछे सीमित होकर रह जाता है, जिससे वैज्ञानिक ज्ञान तक पहुँच बाधित होती है। नवाचार, समता और भारत की ज्ञान अर्थव्यवस्था पर इसके निहितार्थों की चर्चा कीजिए।  
(10 अंक, 150 शब्द)

Publicly funded research often ends up behind the paywalls of commercial publishers, restricting access to scientific knowledge. Discuss its implications for innovation, equity, and India's knowledge economy.  
(10 Marks, 150 Words)

Paper processing charge to select few journals owned by commercial (Springer Nature, etc)

Access to scientific knowledge has become stringently reserved leading to sharp decline in people's hoar information interest causing circulation.

Following are the Implications

① On innovation → restriction on knowledge diffusion  
→ innovation comes after learning and inspiration by fellow researcher works.

→ transparency strengthens diverse minds to contribute and further development happens.

→ slowing translational research

→ risk of research duplication

③ On Equity <sup>Research equity</sup> → exclusion of independent researchers  
→ knowledge justice

→ Affordability remains an issue for first generation

education seekers → knowledge spillovers  
→ human capital formation

→ Right to knowledge <sup>knowledge economy</sup> → interdisciplinary research

basic right of humanity to

develop critical thinking → global research collaboration  
→ scientific soft power

→ Innovation asymmetry

④ On knowledge economy

→ hampered innovation causes

good subheads skewed and limited growth of economy (Nobel Prize 2020, Economics) → relevant to demand of question

Challenges

- open science
- evidence based policy making
- returns on public investment
- Brain drain

⑤ Strategic competitiveness (Technological sovereignty) → Brain drain

→ commercial application needs

wide audience accessibility

Science develops through trials  
errors hence need access to  
ongoing development.

- Scientific social responsibility
- One nation
- One Subscription

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO                        | BODY                                 | CONCLUSION |
|--------|--------------------------|------------------------------|--------------------------------------|------------|
|        |                          | Understand the exact context | { Use keyboards as much as you can } |            |

Q.7) अति-पर्यटन के कारण उत्पन्न होने वाली विभिन्न पारिस्थितिक चुनौतियाँ क्या हैं? धारणीय पर्यटन को बढ़ावा देने के उपायों का सुझाव दीजिए। (10 अंक, 150 शब्द)

What are the various ecological challenges posed by overtourism? Suggest measures to promote sustainable tourism. (10 Marks, 150 Words)

inflow exceeding the carrying capacity of the place.

→ unacceptable deterioration in quality of life & experience in area.

Over tourism refers to unrestricted inflow of tourism to a particular location due to high demand but ultimately causing administrative challenges & others

Ecological challenges due to overtourism →

① Disturbed ecology and micro-biome of indigenous flora & fauna  
Excessive plastic waste (88%) in Himalayas due to tourism  
- The Hindu

② Pressure on limited resources  
→ high demand in tourism

- Biodiversity loss

- migratory patterns & breeding cycles

- encroachment, ecological connectivity

④ Waste management & water stress → garbage mountains in Himalayas

Rivers more construction of ⑤ Air Pollution & carbon footprint  
hospitality centres causing ⑥ Himalayan Glacial melt  
stress on natural resources

⑦ Industrialization of land → ecosystem damage  
in Toshimoto ⇒ destruction  
of fragile ecology - shoreline & riverbank development destroying mangroves

③ Increasing human-wildlife conflict ⑧ Kerala ⑨ Soil erosion & land degradation  
unplanned construction

## Suggestive Measures for sustainable tourism

⑩ Destination planning & diversification  
 → eco-sensitive  
 → community led tourism  
 → source segregation of waste → wastewater reuse  
 → single use plastic

⑪ Demarcating of core areas  
 holding ecologically sensitive  
 areas.  
 ⑫ Introducing tourist permits  
 → stringent regulation of transport  
 → carrying capacity assessment  
 → green certification  
Vehicle restriction

Therefore, it also becomes responsibility of tourists to respect local culture and environment.  
 → promoting regenerative tourism  
 → whole of govt  
 → whole of society approach

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO | BODY                   | CONCLUSION |
|--------|--------------------------|-------|------------------------|------------|
|        |                          |       | Diversify in solution! |            |

Q8) एनडीएमए (NDMA) की भूस्खलन जोखिम प्रबंधन रणनीति के आलोक में, भूस्खलन के प्रभाव के घटाने हेतु तैयारी तंत्रों की चर्चा कीजिए। (10 अंक, 150 शब्द)

In the light of NDMA's Landslide Risk Management strategy, discuss the mechanisms for preparedness to mitigate the impact of landslides. (10 Marks, 150 Words)

tell what do you mean or define landslide ] in such questions

landslide } movement of mass of rocks, debris, earth - down the slope under influence of gravity

NDMA manages disaster management, with increasing cases of landslides, mitigation of impact on human lives become crucial

12.6% of land area of India prone to landslides

NDMA's landslide Risk Management strategy → (2019)

• Mechanisms for preparedness

• zoning of the landslide prone areas

→ landslide forecasting  
→ Early warning system  
→ HRVC assessment

• Enforcing Building Bye laws and unregulated construction on steep slides prone of sliding control policies

More Points

① Mountain zone regulation

② Structural safety

③ Incorporation of government programmes  
Eg PMAY

# Strengthening landslide management infrastructure

Mention challenges

↳ by building countours & buffers at the foothills where transport roads pass

↳ strategy implement

↳ constrained by funding gaps

↳ weak enforcement

## • Active hotline and helpline

[eg] Uttarakshi Tunnel

emergency numbers to

maximise rescue efficiency

↳ climate change impacts

## • Resource and itenary management in times of sudden crisis

## • Building on safe passages to shelters

(Build back better) Sendai

Therefore, preparedness involves preventing the disaster to its mitigation.

Risk informed preparedness

sustained resilience

| SCORE= | HOW TO IMPROVE THE SCORE | INTRO                                 | BODY                                      | CONCLUSION |

|        |                          | Define the concerned natural disaster | Inclusion of various aspects → challenges | key take   |

Q.9) 'संगठित अपराध' से क्या तात्पर्य है? राष्ट्रीय और अंतर्राष्ट्रीय स्तर पर संगठित अपराध और आतंकवाद के बीच विद्यमान संबंधों का वर्णन कीजिए। (10 अंक, 150 शब्द)

What is 'Organized Crime'? Describe the linkages between organized crime and terrorism that exist at the national and transnational levels. (10 Marks, 150 Words)

{ Section 111 of BNS defines organized crime

Organized crime refers to pre-planned, well executed crimes conducted in gang based organisations.

linkages between organized crime & terrorism

At national level →

→ enabling funding by drugs for money exchange

→ money extortion by local gangs being utilised for terror funding of nationally banned organisations.

any continuing unlawful activity by individuals working in concert

→ violence, coercion

Establish Nexus b/w Terrorism & Organised crime

At transnational level

→ cross-border terrorism

funding

Ex - Fake currency

- drug addiction

- supply of narcotics

There is an alternate

structure

Refer sol<sup>n</sup> PDF

→ international gangs operating to help terrorists live activities

Ex Lawrence

Bishnoi

→ Tax evasion to tax havens and money laundering of

black money Ex Swiss Bank

Organised crime can aid evil intentions to destabilise national security infrastructure

Q.10) "केवल फेंसिंग ही नहीं, बल्कि स्थानीय प्रशासन, स्मार्ट प्रौद्योगिकी और सीमा सुरक्षा बल (BSF) सहित पूर्ण क्षेत्रीय रक्षा — एक पूर्णतः सुरक्षित और अभेद्य सीमा ग्रिड का निर्माण करेगी।" इस संबंध में सरकार द्वारा उठाए गए कदमों के साथ चर्चा कीजिए।  
(10 अंक, 150 शब्द)

"Not just fencing, but total territorial defence — including the local administration, smart technology and the BSF — will make for a fully secure and foolproof border grid." Discuss, with the steps taken by the government in this regard.  
(10 Marks, 150 Words)

What's  
territorial  
defense?

↓  
multi layered  
approach

sprinkle  
key terms

Fool proof border grid refers to  
ways and means to protect  
infiltration of borders to secure  
internal stability of the nation.

Need for fully securing the  
borders →

① hostile neighbourhood surrounded  
by china and Pakistan

② Stopping illegal migrants entering  
through porous borders to  
preserve demographics and

protect employment opportunities  
(eg) Rohingyas issue in Myanmar

③ Countering cross border terrorism

→ border governance

→ whole of nation defense approach

→ infra resilience

→ security with  
development

→ security blind  
spots

→ risk based  
resource  
deployment

→ psychological  
deterrence

Stakeholders involved → Government  
→ Citizens

State machinery

Steps taken by Government

→ copy examples from edn PDF

① Vibrant border villages scheme to steadfast border village development along with boosting border security

② Enhanced deployment of BSF along state borders

③ Use of technology for patrolling (e.g. unmanned drones)

Border Security needs technological confluence.

Q.11) आर्थिक संवृद्धि और आर्थिक विकास के बीच अंतर स्पष्ट कीजिए। पर्याप्त रोजगार सृजन के बिना संवृद्धि भारत के लिए एक महत्वपूर्ण चुनौती क्यों प्रस्तुत करती है? (15 अंक, 250 शब्द)

Differentiate between economic growth and economic development. Why does growth without adequate employment generation pose a significant challenge for India? (15 Marks, 250 Words)

Easy Question

Quantitative  
vs  
Qualitative

Differentiate based on aspects

- Nature
- Measurement
- Time Horizon
- Reversibility

Economic growth refers to increase in economic progress, however economic development is inclusive economic growth for all.

**Economic Growth**

→ Increase in growth levels in GDP, PMI, GNP and other economic parameters

**Economic Development**

→ Inner picture of how growth gets translated to lives of people like income per capita.

→ National development based on collective progress

→ concerned with individual empowerment

→ completely an economic indicator of economy as a whole

→ socio-economic issue and highlights social inequality.

# Growth without adequate employment generation pose significant challenge for India as ⇒

① Distrust in institutions

① Demographic & human capital erosion

② systemic

② Poverty & distributional inequality

→ plagued education system which fails its students to fulfil their aspirations

③ Macroeconomic & employment fragility

→ contractual employment

→ declining corporate investment

② Inability to achieve potential GDP growth as young

④ Fiscal, regional &

social stress

→ livelihood deficits

→ distress migration

People remain unemployed

eg Graduates in India

facing the highest unemployment rates of 14-20%.

③ Wasting of demographic dividend to demographic burden

eg → lack of purchasing power in economy leading to reduced production.

⑤ Threat to national stability as young people become hopeless

eg 12th protest in Nepal & Bangladesh

moving beyond GDP-centric growth

Therefore inclusive growth is the basic promise in democracy to be able to participate as member of society.

Q.12) 'भारत के रूपांतरण हेतु परमाणु ऊर्जा का संधारणीय दोहन और संवर्धन (SHANTI) अधिनियम, 2025' एक सुरक्षित और संधारणीय ऊर्जा भविष्य के निर्माण की दिशा में देश की यात्रा में एक महत्वपूर्ण मील का पत्थर है। चर्चा कीजिए। (15 अंक, 250 शब्द)

The Sustainable Harnessing and Advancement of Nuclear Energy for Transforming India (SHANTI) Act, 2025 marks an important milestone in the country's journey toward building a secure and sustainable energy future. Discuss. (15 Marks, 250 Words)

SHANTI Act

The Sustainable Harnessing & Advancement of Nuclear Energy for Transforming India (SHANTI) Act 2025 liberalizes the nuclear sector to undertake private run civilian projects to strengthen clean energy deployment.

modernizes

nuclear governance framework

changes surrounding SHANTI Act →

Vision

- ① → Clean & reliable energy
- ② → Strategic interests

→ Repeal of CNDA and Atomic Energy Act leading to SHANTI Act which changes the scope of nuclear energy development.

→ shifting liability from owner of equipment to

\* Accelerating capacity addition

↳ Energy security

\* Deep decarbonisation

the and operator enabling international nuclear plants to function effectively.

→ Boost to international technology exchange eg Foreign investment in nuclear plant by Russia, France and others

→ Endogenous R&D by unlocking

the 2nd stage of nuclear program of Dr. Homi Bhabha.

→ Ensuring security by following international standards and protocols for plant operation eg NPCIL collaboration with Russia

→ Building a sustainable  
Energy future by achieving  
the goal of 100 kW of nuclear  
energy installation by 2047  
(presently 85W)

### Challenges

→ need for technological  
advancement and self reliant

Cyber security  Recent data

Leak from Kalpakkam by

third party on dark web

Q.13) भारत में कृषि विपणन के अपस्ट्रीम (उत्पादन से संवयन तक) और डाउनस्ट्रीम (प्रसंस्करण से बाजार तक) क्षेत्रों को प्रभावित करने वाली प्रमुख बाधाओं का विश्लेषण कीजिए। इनका समाधान करने के लिए सरकार ने क्या कदम उठाए हैं? (15 अंक, 250 शब्द)

Analyze the major bottlenecks affecting the upstream and downstream segments of agricultural marketing in India. What steps has the government taken to address them? (15 Marks, 250 Words)

Up stream

↳ input supply  
↳ production cost

Downstream

↳ post production flows.

Agricultural marketing in India  
is dominated by APMC and traders, leaving limited room for farmers to cost realisation and price discovery of their produce.

① Input access & Quality

↳ costlier open market purchases  
↳ sub-standard q

② Credit & holding constraints

↳ informal credit (SF)

③ Production side information gap

↳ weak extension reach

↳ poor demand forecasting

Call us: 9311740400, 9311740404

Blog: blog.forumias.com

Upstream

- From farmer to trader to APMC's for wholesale selling

APMC

as the connecting point for upstream & downstream.

④ Regulatory & structural constraints - From APMC's

↳ restrictive licensing to other retailers and to the end consumer  
↳ weak market & integration  
↳ poor bargaining power

⑤ Post harvest inefficiencies

↳ inadequate storage

Visit us: www.forumias.com

Email: helpdesk@forumias.academy

Major Bottlenecks and as

follows →

Upstream  
segment

- highly decentralized and dominated by middlemen
- Farmers attain minimal price and hefty commission to trader
- General hesitancy to go to APMC's themselves
- General convention to go to single affiliated APMC for the fear of lack of procurement

Downstream  
segment

- APMCs of a state capture the entire state market leaving lesser room for price negotiation
- Networks of retailers & APMC leading to significant price hike for end customer
- Heavy logistical losses increasing the prices

Develop  
correct  
understanding  
for  
upstream  
&  
downstream

→ United connectivity giving lesser time for farmers to undertake price discovery

→ Better post harvest management system.

Steps taken by the Government

② Operation Greens

→ Stabilizing prices of TOP

→ Digitizing APMC's across the nation for farmers to be enable to do online price discovery

Good

③ PM FME Scheme

Strengthen micro food enterprises

① APMC initiative of Government

④ SAMPADA Scheme

→ modernising food processing

→ Democratizing APMC working model to aid farmers' accessibility and nationwide coverage of Food processing

⑤ Agri-Udaan

→ Agri startup selected

→ strengthening Industries

Therefore, these bottlenecks need unique solutions to address the concerns of various stakeholders.

Q.14) हाल के वर्षों में बागवानी कृषि (हॉर्टिकल्चर) क्षेत्र में महत्वपूर्ण वृद्धि देखी गई है और यह भारत की कृषि अर्थव्यवस्था में तेजी से महत्वपूर्ण स्थान ले रहा है। इस संदर्भ में, देश में बागवानी कृषि क्षेत्र के अवसरों और चुनौतियों को रेखांकित कीजिए। (15 अंक, 250 शब्द)

The horticulture sector has witnessed significant growth in recent years and occupies an increasingly important place in India's agricultural economy. In this context, bring out the opportunities and challenges of the horticulture sector in the country. (15 Marks, 250 Words)

→ Science & art of → Production  
→ Utilization  
→ Improvement } → Horticultural crops

Horticulture sector refers to cultivation of high value products in food crops for export and urban market consumption purposes, boosting India's agricultural economy.

opportunities for Indian horticulture sector →

① → ↑ Doubling of farmers' income  
by investing in high value crops — fruits & vegetables that are in high demand in western markets

Ashok Dalwai Committee

→ made this statement

②

Higher production  
from lesser  
area

→ higher profit

→ Income diversification to  
compensate for agricultural  
uncertainty due to climate  
change.

③

→ Women empowerment as  
most women work as farmers

to support family

→ Extra income by incorporating

horticulture.

→ Governmental support to

develop and boost Indian  
exports. → Be specific

→ Regional development

(eg). Almonds → Kashmir  
• Strawberries → Uttarakhand  
• Oranges → Nagpur

Valid point

Mission for  
Integrated  
Development of  
Horticulture

MIDH

## Challenges for Horticulture sector →

→ limited awareness about the potential value of horticultural crops

eg Farmers oriented due to high investment and lack of MSP support

→ Agricultural policy bias eg MSP  
→ inadequate infrastructure

→ Access to affordable credit

↳ leading to exploitation by money lenders eg Maharashtra

Farmers' suicide

→ limited access to quality inputs

↳ international standards  
↳ export attractiveness

way forward

ok } Government needs to devise dedicated policy to address the concerns and set up prompt post-harvest management system.

Q15) भारत के ऊर्जा संक्रमण और डिजिटल अर्थव्यवस्था के लिए महत्वपूर्ण खनिजों के रणनीतिक महत्व पर चर्चा कीजिए। सोवर्णीय और संचारीय महत्वपूर्ण खनिज आपूर्ति श्रृंखलाओं को सुरक्षित करने में प्रमुख चुनौतियाँ क्या हैं? राष्ट्रीय महत्वपूर्ण खनिज मिशन (NCMM) की मुख्य विशेषताओं का उल्लेख कीजिए।  
(15 अंक, 250 शब्द)

Discuss the strategic importance of critical minerals for India's energy transition and digital economy. What are the major challenges in securing resilient and sustainable critical mineral supply chains? Mention the salient features of the National Critical Mineral Mission (NCMM).  
(15 Marks, 250 Words)

What?

- non-fuel minerals
- essential for
  - ↳ economic development
  - ↳ national security
- high supply chain vulnerability
- geographic concentration

Critical minerals refer to minerals of strategic national importance to drive technological progress in field of semiconductors & chip development.

# Strategic Importance of critical minerals →

① Clean Energy Transition

- ↳ core technologies
- ↳ Net zero by 2070
- ↳ domestic manufacturing

Eq electrolyzers of lithium powered batteries  
National Green Hydrogen Mission 2023

②

Digital economy revolving around semiconductors for hardware to enable AI development. AI hardware & data centers are good.

# Major challenges in securing resilient & sustainable critical minerals supply chain →

Geopolitical & institutional barriers

→ Weaponisation

→ resource nationalism

→ procedural bottlenecks

① → Geopolitical uncertainty & tensions causing AI war,  
reciprocal tariffs, disruption  
of trading chokepoints  
↳ difficulty in accessing  
critical minerals as dynamically  
changing diplomacy

↳ creation of pax silica  
on the lines of china+1 and  
resilient supply chains for AI  
and semiconductors

→ structural & market vulnerabilities

→ import dependency, thin domestic reserves, weak downstream ecosystem

② → Economic challenges  
↳ high import cost needs  
to be balanced by economy of

opaque markets

→ price volatility

# Salient Features of NCMM

## ① Exploration & Sourcing

- ↳ securing overseas assets.
- ↳ processing parks

## ② Recovery, stockpiling & recycling

- ↳ immunity from global shocks
- ↳ advance circular economy

## ③ Research & Governance

- ↳ Anchor R&D
- ↳ institutional coordination
- ↳ whole of government approach

scale which becomes difficult as it requires intensive long term investment and R&D

↳ weak R&D infrastructure in India

## ③ - Political challenges

↳ ground achievements get barely translated as proposed by schemes due to skewed and delayed funding

↳ Deep tech startups are difficult to build due to higher paperwork

## Salient Features of NCMM

→ Focus on AI & Semiconductor  
eg Vikram 32/64 bit launched

→ Hub & spoke model to develop experts  
→ import & export control on strategic critical minerals of government.

India needs to strengthen its action to see Vikrit Bharat.

Q.16) हाइड्रोजन ईंधन सेल (फ्यूल सेल) प्रौद्योगिकी वैश्विक स्तर पर जीवाश्म ईंधन आधारित कर्षण (ट्रैक्शन) प्रणालियों के एक आशाजनक विकल्प के रूप में उभरी है। हाइड्रोजन ईंधन सेल ट्रेनों के कार्य सिद्धांत की विवेचना कीजिए। साथ ही भारतीय संदर्भ में इनके संभावित लाभों और सीमाओं की चर्चा कीजिए।

(15 अंक, 250 शब्द)

Hydrogen fuel-cell technology has emerged globally as a promising alternative to fossil fuel-based traction systems. Explain the working principle of hydrogen fuel-cell trains. Also discuss their potential advantages and limitations in the Indian context.

Clean Energy method using electrochemical reaction b/w H & Oxygen  $\Rightarrow$  Chemical energy  $\rightarrow$  electricity (15 Marks, 250 Words)

## Hydrogen fuel cell technology

refers to energy being derived by atoms of hydrogen owing to electron hypermovement to give energy for human consumption.

Hydrogen powered train (Jind - Sonapat Section)

"Decarbonisation potential"

## Working principle of Hydrogen fuel cell trains $\rightarrow$

$\rightarrow$  Trains powered by hydrogen fuel cell energy where in the electron movements between anode & cathode is used for

① Proton Exchange Membrane fuel cell

② might not be asked

irrelevant

→ write scientifically!

energy production along with photoelectric effect of Hydrogen atom electrons to get excited and make energy level transition to release significant amount of energy that gets utilised to run the H-powered train.

Can write in Tabular manner

Potential Advantages for India →

→ of railways

Advantages

→ zero tailpipe emissions, lifecycle decarbonisation, Net zero by 2030  
→ acoustic sustainability

→ Renewable source of energy

→ rapid refueling, mass-transit scalability, hybrid energy efficiency

as it utilises chemistry

principles of fuel cell

photoelectric effect, reducing

import dependency needed in fossil fuel based traction systems.

① Environmental Protection

② Operational suitability

③ Energy & Technology Security

- Replacing diesel with domestic green hydrogen
- grid flexibility
- technology indigenisation
- anchor market creation

→ boosting R&D culture and logistical infrastructure

↳ water-energy trade off

strengthening as it can be utilised for bullet trains

② Economic constraints

- ↳ High life cycle costs
- ↳ expensive catalysts
- ↳ raise import dependence
- ↳ demand uncertainty

Limitation of Technology →

Disadvantages.

③ Infrastructure & technological constraints

- ↳ Refuelling challenges
- ↳ durability concerns
- ↳ hydrogen's high flammability

→ Technological expertise to commercially outscale, ensuring everyone safety.

↳ extensive rail electrification

ⓔ Need for international collaboration

→ Initial energy effect needed to start the fuel cell

→ long term working of the train system.

therefore, synergy in economy, technology, society & government becomes crucial.

Hydrogen trains to complement

↳ decarbonising difficult to electrify corridors

Q.17) देश में एथेनॉल सम्मिश्रण (एथेनॉल ब्लेंडिंग) बढ़ाने के पर्यावरणीय, आर्थिक और तकनीकी प्रभावों का परीक्षण कीजिए।  
 Examine the environmental, economic and technological implications of increasing ethanol blending in the country. (15 Marks, 250 Words)

Ethanol Blended Programme

→ launched 2003

→ National Policy on biofuels 2018

★ 20% achieved in 2025

\* Environmental

+ve → climate action & env benefits  
 → urban air quality  
 → Sustainable development  
 SDG - 7, 8, 12, 13

-ve → Resource stress & pollution  
 → water stress  
 → waste generation  
 → biodiversity loss

2010  
 ↓  
 2025  
 2017  
 ↓  
 2028

Ethanol blending refers to introducing ethanol in petrol or fossil fuel derived products to introduce renewability for sustainable development.

environmental implications of ethanol blending →

→ Introduction of cleaner fuel and reduced dependency on excen of fossil fuel based energy source.

→ Reduced carbon emissions as ethanol is relatively lesser

carbon dense than complex fossil fuel chain

→ Production of Ethanol is cleaner and environmental friendly

### Economic Implications

→ Reduced import bill of crude oil as decreased dependence on petrol & diesel

→ Ethanol is affordable than fossil fuel based energy sources

→ Economic cost of transition  
↳ awareness generation

↳ Boost to Global Merit Pledge initiative.

### Economic Implications

**+ve**

- Energy security
- crude oil dependence
- balance of payments

**\* Agriculture & Industrial development**

domestic biofuel manufacturing

**\* farm incomes**  
↓  
**assured demand**

**-ve**

- Food Security
- ↳ resource sustainability
- food vs fuel trade off

② → Fiscal burden & regional imbalances

③ → Higher transition cost

- ↳ automobile adaptation
- ↳ engine compatibility

+ve

→ Industrial transformation

→ innovation by developing advanced biofuels

→ circular bioeconomy

Technological implications →

→ Establishing engines able to work with ethanol blended

petrol and diesel

-ve

① → limited commercial viability — 2G Ethanol

→ Capital intensive technology

→ seasonal feedstock availability

→ Recent challenges

and reduced mileage of

② Storage & transportation & technology gaps  
luxury cars

→ blending & distribution infrastructure

→ hygroscopic nature

Conclusion

→ diversifying feedstocks

→ scaling advanced biofuels

→ sustainable agricultural practices

Government needs to bear the cost of initial transition and technological downgrade needs R&D by vehicle manufacturers to meet the green goals.

Ethanol blending

→ sustainable & inclusive

Q.18) भारत ने हाल ही में जलवायु परिवर्तन पर संयुक्त राष्ट्र फ्रेमवर्क कन्वेंशन (UNFCCC) और इसके वैश्व समझौते के प्रावधानों और सिद्धांतों के अनुसार वर्ष 2031-2035 की अवधि के लिए अपना राष्ट्रीय स्तर पर निर्धारित योगदान (NDC) प्रस्तुत किया है। अपने क्रमिक NDCs के तहत भारत द्वारा की गई प्रमुख प्रतिबद्धताओं को रेखांकित कीजिए और इस दिशा में हुई प्रगति पर चर्चा कीजिए। (15 अंक, 250 शब्द)

India recently submitted its Nationally Determined Contribution (NDC) for the period 2031-2035, in accordance with the provisions and principles of the United Nations Framework Convention on Climate Change (UNFCCC) and its Paris Agreement. Outline the key commitments made by India across its successive NDCs and discuss the progress made in this regard. (15 Marks, 250 Words)

2015 2022 2026  
Nationally Determined Contributions

(NDC) refers to voluntarily set targets undertaken by countries to achieve limited global warming to lower than 2°C 1.5 - 2°C of global temperatures.

Following are the recent NDC's under UNFCCC framework →

# India has pledged to achieve the following in (2031-2035):  
① → 3.5-4 billion metric of

Must mention terms →

\* Paris Agreement 2015

by UNFCCC

NDC → to communicate

- mitigation
- Adaptation commitments

(Article-4)

2015 → ① Emissions intensity — 2030

② installed electric power — 40% — 2030  
↳ non-fossil fuel sources

③ Additional carbon sink (2.5-3 billion ton C)  
Carbon sink creation

2022

↳ Emission red<sup>n</sup> → 45% of GDP

↳ 50% of cumulative electric power

② → Net neutral Carbon neutral target unshifted to 2070

③ → Ethanol blending of 30% in Petroleum products.

2026  
↳ emission red<sup>n</sup> → 47% by 2035

↳ 60% cumulative installed electric power capacity to 60% 70%

↳ additional carbon sink → 3.5-4 billion tonnes

③ → Clean energy creation avenues

Progress of India

→ India was able to install 50% of installed energy from renewable sources

→ Ethanol blending got completed to 20% by 2025 (instead of

check sol<sup>n</sup> PDF

2030).

→ India is progressively developing clean energy resources eg nuclear energy

development

→ SHANTI Act to liberalise  
→ unlocking FBR stage at

Kalpakkam

Challenges

- Being a developing country, India needs capital to support its green ways.
- increasing cases of green washing
- rampant policy measures causing trust issues among people  
eg Ethanol blending

Therefore, Government needs active civil engagement to follow the path.

Q.19) परमाणु त्रय (न्यूक्लियर ट्रायड) से क्या तात्पर्य है? भारत के परमाणु त्रय को सशक्त करने और निष्पक्षतापूर्ण समुद्री आधारित निवारण (डिटेरेस) सुनिश्चित करने में परमाणु संचालित बैलिस्टिक मिसाइल पनडुब्बियाँ (SSBNs) की भूमिका की चर्चा कीजिए। (15 अंक, 250 शब्द)

What is meant by 'nuclear triad'? Discuss the role of nuclear-powered ballistic missile submarines (SSBNs) in strengthening India's nuclear triad and ensuring credible sea-based deterrence. (15 Marks, 250 Words)

delivery of nuclear weapons

Nuclear Triad refers to weapon capable of multi-action in attacking air, water and nuclear capabilities. good

based platforms

Meaning of Nuclear Triad

→ Abilities to any type warfare  
 eg → Air based ballistic missile  
 → water through submarine attacks  
 enabled nuclear weapon carrying and attacking facility.

Second strike capability

Role of Nuclear Powered ballistic missile submarines (SSBNs) →

→ undetectable  
 → dispersed

→ additional nuclear warhead

capabilities through nuclear  
powered submarine ~~eg~~ Tamir, Akash

Nuclear Deterrence

↳ credible  
minimum  
deterrence

→ long range ballistic missile  
projectile range to reach

① operational advantage

any distances  
↳ from sea to land  
sea to sea

↳ strategic reach

or force diversification

② Atmanirbharta

→ Boosting the vision SAGAR  
to secure Indian ocean  
Region helping in strategic  
influence of India in its  
immediate neighbourhood.

Challenges

→ fleet limitations

→ lack of multi-theatre  
deployment credibility

→ effective deterrence from  
border countries  
eg China & Pakistan

→ specialised  
crew

② Technological & capability constraints

Gaps in:

↳ acoustic stealth

↳ quieting technologies

↳ shorter range SLBMs

others

↳ geographic limitation

→ International cooperation and  
boost to defence manufacturing

Way forward

- R&D

- indigenous development in

↳ Philippines interested in purchasing Brahmos missile

out of context

Don't deviate from topic

operation Sindoor surfaced capabilities of India in advancing manufacturing the technically evolving landscape of defence weaponry development.

Q.20) मानवाधिकार कार्यकर्ता लगातार इस तथ्य को रेखांकित करते हैं कि गैर-कानूनी गतिविधियाँ (रोकथाम, अधिनियम, 1967 (UAPA) एक कठोर कानून है जिसका दुरुपयोग होने की संभावना रहती है, जिससे नागरिक स्वतंत्रता और घथोचित प्रक्रिया को नुकसान पहुँचता है। कार्यकर्ताओं द्वारा अधिनियम के किन प्रावधानों का विरोध किया जाता है? न्यायिक निर्णयों के संदर्भ में उनकी आवश्यकता का समालोचनात्मक मूल्यांकन कीजिए।  
(15 अंक, 250 शब्द)

Human rights activists constantly highlight the fact that the Unlawful Activities (Prevention) Act, 1967 (UAPA) is a draconian law that is prone to misuse, thereby undermining civil liberties and due process. What provisions of the Act are opposed by the activists? Critically evaluate their requirement with reference to judicial pronouncements.

(15 Marks, 250 Words)

## Unlawful Activities (Prevention) Act-1967

(UAPA) was introduced to legalise preventive detention to avert terrorism and ensuring internal stability of India.

- for
- ① → counter terrorism
  - ② → fight secessionism

## Objective and Working Mechanism of UAPA →

- ③ → protecting sovereignty & integrity of India

→ 'Right to bail' to the accused is taken away due to possibility of conduction of crime

→ Detention with subsequent approval of courts that ensure legitimate state action.

Arguments for

Provisions and concerns of activists →

→ More application for dissent in democracy

① National Security Imperatives

↳ exceptional security threats

Eg Kartar Singh v State of Punjab (1994)

② Prioritising collective security

Eg Arup Ahluwalia Review 2013

country can't be established as it remains undefined

Critical evaluation of the provisions

a) Right to bail at the discretion of courts

↳ courts follow the procedure of law by being satisfied that individual doesn't tamper with evidences

Eg Ability to conduct hidden terror operation — Gomath temple case

b) Direct action to right to free speech and expression

↳ Ideological proposition can be taken as 'planning' for

Arguments

against :-

① Civil liberties concern

↳ Presumption of innocence  
 Eg Noor Aga case

↳ reverse burden of proof

② Expanding executive discretion w/o judicial oversight

Eg Hitendra Vishnu Thakur 1994

③ Encourages over-criminalization

↳ no prosecution for every act of omission / commission

Eg Ranjit Singh case

- weakening of judicial oversight

national instability (eg JNU student held in CAA-2019 (anti law) protest)  
 ↳ Umar Khalid & charged Imam remain without proper trial.

① lack of accountability & transparency in application of law

↳ No clear deadlines for stipulated preventive detention

(eg) J & K activists for protesting lawfully and publishing against the government (Zubair case)

Therefore, UAPA has to be limitedly applied against citizens who advocate for policy changes rather genuine security challenges.
